EDUCATION

Isra Private University, Jordan — B.S. in Software Engineering

FEB 2006 - June 2009

PROJECTS

Transforming a monolithic application into a microservices-based architecture. — *ShareNow.com*

Transforming a monolithic application into a microservices architecture is a complex undertaking that involves breaking down a large, monolithic application into smaller, independent services.

Receipt Wallet App — *ReceiptWallet.app*

Receipt Wallet is a digital receipt mobile app used to store digital copies of paper receipts on a mobile device.

I assumed the responsibility of defining the software architecture while effectively leading a cross-functional team.

Bitcoin Payment Gateway — *EdenMoney.com*

I led a groundbreaking project to create a Bitcoin payment gateway, leveraging blockchain technology to enable secure and efficient Bitcoin transactions across online platforms
